WT The leukocyte adhesion proteins are noncovalently linked
heterodimers of distinct alpha and identical beta chains. These
structurally related glycoproteins mediate cell-adhesion
reactions, and a deficiency of them is attributed to a genetic
defect in the expression or structure of their common beta chain.
GEICATION *superfamily integrin beta chain.

Title: >US-08-866-354-4
Description: (1-468) from USO8866354.pep
Perfect Score: 3384
Sequence: 1 MFLATLYFALPLLDLLMSAE.......PVLMLTALAALLSVSLAETS 468
Scoring table: PAM 150
Gap 11
Searched: 69111 seqs, 25083644 residues

Post-processing: Minimum Match 0% Listing first 45 summaries

Database: swiss-prot35 1:swiss1

Statistics: Mean 47.975; Variance 67.645; scale 0.709

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ASSEMBLY DUDDING, MATURATION, AND INFECTION STACES OF THE VIRAL ASSEMBLY, BUDDING, MATURATION, AND INFECTION STACES OF THE VIRAL REPLICATION CYCLE. DURING VIRAL ASSEMBLY, THE PROTEINS FORM MEMBRANE ASSOCIATIONS AND SELF-ASSOCIATIONS THAT ULTIMATELY RESULT IN BUDDING OF AN IMMATURE VIRION FROM THE INFECTED CELL. GAG PRECURSORS ALSO FUNCTION DURING VIRAL ASSEMBLY TO SELECTIVELY BIND AND PACKAGE TWO PLUS STRANDS OF GENOMIC RNA.

1- PTM: THE P24 PROTEIN IS PHOSPHORYLATED.

Statistics: Mean 46.587; Variance 79.510; scale 0.586

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
